STUDY ON THE CONDENSATION OF POLYETHYLENE TEREPHTHALATE WITH OTHER POLYESTERS. (1962) 2p.

(figs., unclassified)

Order from ST A 31, 60

62-20078

Trans. of Textilforschung und Textiltechnik (Germany) 1960, v. 11, no. 8, p. 150-159.

DESCRIPTORS: "Block polymers," "Polyethylene plastics," "Phthalate," "Polyester plastics," Condensation reactions, Dyestuffs, Fibers (Synthetic).

The interchange reactions taking place in the melt between polyethylene terephthalate and various polyesters are examined and the factors determining their rate of reaction discussed. With shortened cocondensation times, block polyesters are prepared which may be spun into fibers having improved dyeing properties. Polyethylene hexahydroterephthalate is especially appropriate for the block component. (Author)
